

HEALTH 400

Spray dried milk product lactose reduced, produced from skim milk using lactase.
HEALTH 400 contains less than 1% lactose.

Applications:

As a replacement for skim milk powder in lactose reduced or lactose free:

- Chocolates
- Ice creams
- Cakes and pies
- Dietary foods
- Muesli bars
- Desserts
- Ready-to-eat meals

Product advantages:

- Like conventional skimmed milk powder, Health 400 can be used in the development and production of foods
- Excellent suitable for lactose reduced or lactose free food
- Health 400 can be used as a natural sweetener and/or for the reduction of saccharine
- No sandiness in ice cream caused by crystallized lactose - allows the production of a much creamier ice cream
- Contains all important nutrients of the milk like vitamins, calcium and minerals

Product information:

Required quantity:

Depending on intended use and application.
Health 400 can be dosed like conventional skimmed milk powder.
Anyhow The strong sweetness is to be considered.
