

Vendingline toppings and coffee whiteners for vending machines - a reliable choice

Vendingline instant powders offer tested vending machine quality at a very good price-performance ratio.

All products are suitable for use in table top units, stationary hot drink machines and coffee machines. This makes them universally applicable for vending, HoReCa and office service applications.

Their free-flowing properties, bulk weight and dosages have been carefully adjusted to the common types of vending machines thus ensuring trouble-free operation.

Our coffee whiteners produce perfect whitening for coffee and tea, while our Cup Topping gives specialty coffees a stable, milk-like white cap. Recommendation: Kaffeeweiss 15 and F are also suitable for use as a topping, ideal for premium mix beverages and also for use in smaller vending machines
